PROFILE

Software Engineering student and web developer with experience building and improving business websites and web applications. I work mainly with HTML, CSS, JavaScript, PHP and MySQL, with a focus on responsive design, simple user experiences and reliable functionality. I have worked on projects from the first design and development stages through testing, deployment and later updates.

FEATURED PROJECTS

Deckler Engineering Services Ltd — Corporate Website | Lead Web Developer

- Built a multi-page corporate website from scratch for an engineering and oil & gas services company.
- Created responsive pages and interactive features using HTML, CSS and JavaScript.
- Built a custom PHP admin system for updating website content and project information.
- Deployed the website, made updates after launch and handled basic technical/on-page SEO and search indexing setup.
- Live website: <https://decklerng.com/>

Anime Social — Full-Stack Social Web Application | Developer

- Currently building a PHP/MySQL social platform for anime, manga and gaming communities.
- Built features including user profiles, feeds, follows, comments and replies, polls, saved posts and notifications.
- Added account authentication, admin and moderation tools, user verification and confirmation dialogs for important actions.
- Built the catalogue system for anime, manga and characters, including API integration, caching and tools for finding and importing content.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, Responsive Web Design

Backend: PHP, MySQL, Database-Driven Applications

Web: Custom CMS Development, API Integration, Authentication, Website Deployment, cPanel, Basic Technical & On-Page SEO

Other: UI Implementation, Website Maintenance, Debugging, Mobile Responsiveness

EDUCATION

B.Sc. Software Engineering — In Progress

Augustine University, Nigeria

ADDITIONAL PROJECT WORK

- Building my web-development portfolio around business websites, redesigns, landing pages and custom admin systems.
- Worked on live-site updates including content changes, mobile fixes, SEO updates, debugging and deployment.

STRENGTHS

Responsive Development • Problem Solving • Attention to UI Detail • Independent Project Delivery • Continuous Learning
